

Quiet Valley's Story

The history of Quiet Valley Living Historical Farm begins early 1760's when the Depper family left their home in the Palatinate region of Germany to start a new life in America. They sailed from Rotterdam to Philadelphia in, arriving in 1765, and eventually made their way north looking for land that they could farm. They settled in Quiet Valley near modern Stroudsburg, Pennsylvania. In 1780 their daughter Katherine married Johann Ludwig Meyer who had originally come to America as a Hessian soldier during the Revolutionary War. Johann and Katherine passed the farm on to their son, a carpenter/farmer named John Simon Meyer. John Simon Meyer's daughter and son-in-law, Hannah and Peter Marsh received the farm next. They sold the farm to their son Horace who lived on the farm until 1913 when the farm was sold outside the family.

Support Quiet Valley

Support Quiet Valley's mission of educating the public about our shared agricultural history by stopping in our Gift Shop and becoming a Member or making a generous donation to Quiet Valley Living Historical Farm. Any and all support is appreciated!
